

Swiggy Sales Analysis — Pan-India Business Performance

January – August 2025 | Data Analysis & Insights Report

Prepared by: [Soumen Biswas]

Date: [12/09/2026]

Scope 993 Restaurants · 28 States · 8 Months	Data Period January 2025 – August 2025	Purpose Staffing, Promotions & Regional Strategy
--	--	--

Executive KPI Summary

Nationwide Swiggy order data analyzed to assess platform health and uncover patterns for staffing, promotions, and regional strategy across 8 months of operations.

₹5.30Cr

Total Sales

Gross revenue across all cities and categories

1,97,430

Total Orders

Platform-wide orders fulfilled Jan-Aug 2025

₹268.51

Avg. Order Value

AOV across Veg and Non-Veg segments combined

4.34

Avg. Rating

Out of 5.0 — consistent across all quarters

Rating Count

5,591,574 total ratings received — a strong engagement signal across the platform

Platform Footprint

993 restaurants across **28 states** — true pan-India coverage over the full 8-month window

Sales Trends: Monthly, Daily & Weekly

Monthly Sales Trend (Jan–Aug 2025)

Monthly band stays tight between ₹62.7L – ₹68.3L. Jan & Aug are strongest; Feb is the lone dip. Demand is structurally stable with no major seasonal collapse.

Daily Average Sales by Day of Week (₹ Lakhs)

Saturday peaks at ₹77.8L; Tuesday is the weakest at ₹73.6L. Thu–Sat consistently outperform early-week days — a clear staffing and promotional signal.

Key Takeaway: Stable demand overall — weekends + Thursday outperform early week. Target Tuesday promotions and optimize courier staffing for Sat/Thu/Fri peaks.

Food Type & Geographic Performance

Order Split: Veg vs. Non-Veg

Veg Segment

69.4% orders · 63% revenue · AOV ₹243.49

Non-Veg Segment

30.6% orders · 37% revenue · AOV ₹325.36 (+34% vs. Veg)

Top 5 Cities by Sales Contribution

The **Top 5 metros collectively account for ~33% of total national sales**, confirming heavy revenue concentration in urban centres. The remaining 67% is spread across 23+ additional states — significant headroom for regional growth campaigns.

Quarterly Performance & Data Caveat

■ Sales (₹ Crore) ■ Orders (K)

1 Q1: ₹1.97 Cr | 73,096 orders
3-month full quarter. Monthly average: ₹65.7L/month

2 Q2: ₹1.99 Cr | 74,163 orders
3-month full quarter. Monthly average: ₹66.3L/month

3 Q3: ₹1.34 Cr | 50,171 orders
2-month partial period. Monthly average: ₹67.2L/month — fully in line with Q1 and Q2

⚠ Important Data Caveat

Q3 covers **only 2 months** (July–August 2025), not a full quarter. The raw ₹1.34 Cr figure is **NOT a decline** in performance.

When normalized to a monthly average of **₹67.2L/month**, Q3 is actually the *strongest* monthly run rate across all three periods — reflecting continued platform momentum.

Rating consistency: ~4.34 / 5 held steady across all quarters regardless of order volume — a signal of robust and reliable service quality.

Recommendations & Next Steps

Optimize Courier Staffing

Deploy heavier courier coverage on **Saturday, Thursday, and Friday** when demand peaks at ₹77.8L/day. Run leaner on **Tuesday** (₹73.6L) to reduce idle cost without impacting SLA.

Non-Veg AOV Uplift

Non-Veg carries a **34% AOV premium** (₹325.36 vs. ₹243.49). Cross-sell and bundle Non-Veg items to Veg-dominant customers to lift blended AOV across the platform's majority segment.

Targeted Promotions

Launch midweek offers specifically on **Tuesdays** to lift the week's lowest-performing day. Intensify promotional spend during the **February-June** window to counteract the seasonal dip observed in Feb (₹62.7L).

Metro Protection & Regional Expansion

Protect revenue from the **Top 5 metros** (Bengaluru, Lucknow, Hyderabad, Mumbai, Delhi) which drive ~33% of national sales. Run **targeted acquisition campaigns** in underperforming states to diversify revenue concentration across 28 markets.
